MISSION

[Mission]

Contribute to realizing a comfortable life for all customers in their communities through energy and home & life services

SINANEN HOLDINGS Group has continued to adapt to the changing times since it was first founded in 1927.

To achieve a decarbonized society and contribute towards an even better lifestyle for our customers as a comprehensive energy life creation group.

We aim to grow and evolve further as our 100th anniversary approaches.

[Greetings]

Continuing to contribute to decarbonization and comfortable living by changing in a flexible manner.

The SINANEN HOLDINGS Group is approaching its 100th anniversary in 2027. Before this major milestone, the Group has commenced its 3rd Medium-Term Management Plan, which will span a period of 5 years from FY2023. We have declared "Evolution into a comprehensive energy life creation group that contributes to achieving a decarbonized society" as our vision.

As well as further strengthening our management foundation established so far, we also aim to make a giant lead in 2027 by focusing on the growth of individual employees through corporate culture changes, and of course transforming and growing the business.

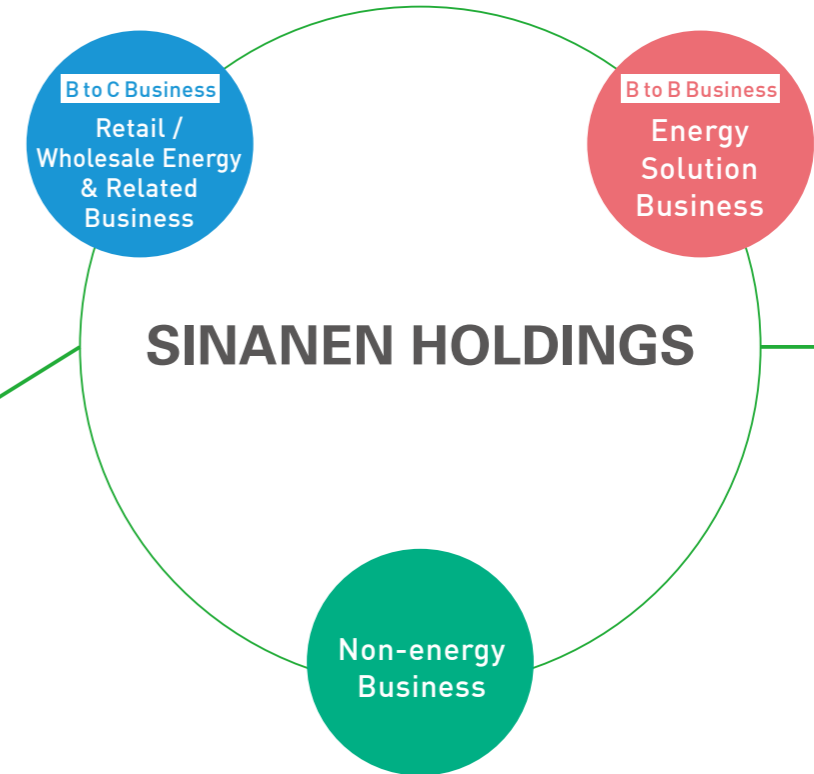

The circumstances surrounding energy change constantly, and the living environment of people has also changed after the COVID-19 pandemic. While responding to these changes, we will continue to contribute towards achieving a decarbonized society, a goal shared throughout the world. This is our obligation as a comprehensive energy service group. We will continue to aim to be a group that contributes towards the conservation of the global environment and comfortable living for people."

SINANEN HOLDINGS CO., LTD.
President and CEO Masaki Yamazaki

[Business Field]

Between people and energy, housing and living.

Toward the supply of energy that is friendly to the global environment, the SINANEN HOLDINGS Group is developing in the three areas of comprehensive energy, home and life service businesses.

[Value]

Principles Three foundations

The idea of "shingi" is that we keep our promises, respond to the trust of others, have a sense of responsibility and perform our duties. It is the basis of our management.

The idea of "shinshu" is to make progress by overcoming all difficulties and boosting the value that the SINANEN HOLDINGS Group offers society. It is the basic spirit of our business.

The idea of "rakugyo" is feeling joy in our work, finding the fun in our work, and improving our character while having a wide range of interactions with various people. It represents the image of our employees.

Bringing greater comfort to the lives of our customers by keeping close relations with local communities. We provide an extensive range of services, from selling energy to solving problems concerning daily living.

Energy Business

We deliver the best products and services to customers from among various energy types such as LP gas, kerosene and electricity. We contribute to comfortable living by supplying stable energy through regular safety inspections.

Home Business

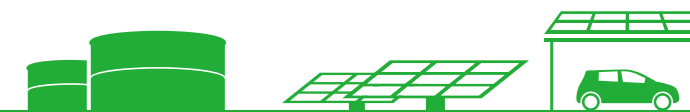

Houses that are energy efficient and reduce environmental load. Houses where the entire family can live comfortably due to the barrier-free construction. A business that proposes and achieves even better living for its customers and the planet.

Life Business

We solve problems concerning living, such as house cleaning and water-related problems. We provide days of unchanging safe living, even when the lifestyle of many people is undergoing change.

Becoming the No. 1 partner in the region that is close to customers

As well as the traditional energy business, we will also be focusing on the renewable energy business and clean power sales business from now. We provide a variety of energy services and solutions.

Renewable energy Business

We have been working on the renewable energy business while mainly focusing on developing a solar power plant in Japan. In recent years, we have also been working on developing a solar power plant for corporate PPA, and contributing towards the decarbonization of companies that want to cut their CO₂ emissions.

Electricity Business

We supply electricity to many customers as an electricity retailing company. We also develop electricity menus for 100% renewable energy that consider the environment, and contribute towards the reduction of CO₂ emissions. Furthermore, we have been working on the "Akari no Mori Project", an activity to actively protect the natural environment, for a sustainable future.

Petroleum Business

With extensive supply and sales networks established in various locations, we stably deliver petroleum products to corporate customers nationwide. We also have a proven record in sectors that require advanced specialization such as the supply of fuel for ships.

Providing a variety of services to customers in Japan and overseas

Non-energy Business

We are actively expanding our business field in sectors other than energy.
We are supporting the future of society from diverse perspectives.

■ Bicycle Business

We import and sell bicycles as one of the largest bicycle import and trading companies in Japan. We are currently developing the "Daisharin" bicycle retail shop.

■ Share Cycle Business

We provide one of the largest bicycle sharing services in Japan, focusing on Tokyo, Kanagawa Prefecture, Saitama Prefecture and Chiba Prefecture as well as Osaka Prefecture. This contributes towards solving traffic congestion problems and improving accessibility of the region through mobility.

■ System Business

We provide core business systems for LP gas companies, and provide electric power CIS for retail electric power companies as a cloud service.

■ Building Management and Maintenance Business

We provide services such as cleaning, disinfection & sterilization, restoration, renovation, gas equipment work, and energy saving proposals. We provide extensive maintenance, management and operation services for buildings and housing complexes.

■ Environment and Recycling Business

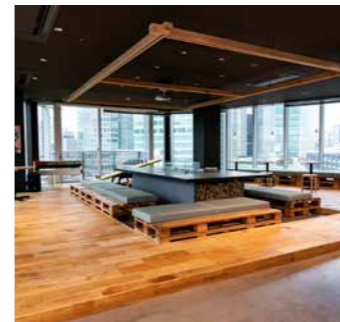

We provide a stable supply of fuel and raw materials from recycled waste, mainly wood chips.

■ Antimicrobial Business

We provide antimicrobial agents such as "Zeomic", which have excellent antimicrobial effects and are highly safe, for a wide range of applications in Japan and overseas.

■ Shared Office Business

Utilizing three floors of our former head office building, we operate the shared office space "seesaw".

SUSTAINABILITY

[Sustainability]

Contributing towards achieving a sustainable society for the future of our planet

We aim to realize a sustainable society based on the three themes set out in our charter of corporate behavior: shingi, shinshu and rakugyo.

Clean energy

Environment

With the popularization of energy from natural sources and high-efficiency energy equipment, we have been actively promoting the recycling business and are supplying environmentally-friendly energy so that we can contribute towards protecting the global environment.

Renewable energy

Endorsement of Task Force on Climate-related Financial Disclosures (TCFD)

Promoting eco-friendly driving

Himawari inspections

SINANEN Akari-no-Mori Project

SUSTAINABLE DEVELOPMENT GOALS

Environmental awareness activities for children and school students

ESG

SDGs

Social

We have implemented various social contribution activities making use of our group's business. We are creating a workplace where employees are motivated by such measures as promoting diversity and ensuring full compliance in the group.

Itsumo Arigato (Thank You) Essay Competition

Holding events where parents and their children can learn

Governance

While establishing and clearly defining such aspects as our corporate governance process and risk management system, we are actively transparent about the appointment of management personnel from outside the group to establish a management system that makes appropriate and prompt decisions.

Promotion of health management

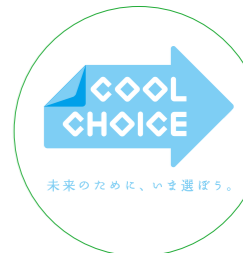

Strengthening governance

Participation in agriculture-welfare collaboration

The entire group aims to contribute through its business to achieving sustainable development goals, which are international objectives selected during the UN summit.

Supporting COOL CHOICE

Management services for vacant houses

HISTORY

To achieve a decarbonized society.

We have so far dedicated ourselves to ensuring a more comfortable lifestyle for our customers.

From hereon, it is important that we contribute towards creating a comfortable “future” in addition to the comfortable “present”. We began providing clean energy such as solar power generation, and want to provide new services based on the expertise we have developed as an energy trading company. We are also considering the creation of an even better way for both our customers and the environment.

As a comprehensive energy life creation group that contributes towards achieving a decarbonized society, we will work hard to move towards a comfortable future together with everyone.

Please expect SINANEN HOLDINGS Group to continue to grow and evolve further while adapting to the changing times.
